

MedLab

Clinical Reasoning Training, Reimagined with AI

500 Eurasia Pitch Deck

Nicholas Chovelidze

The Problem

Medical Education has a Competency Crisis

No realistic Practice

Medical students graduate without hands-on exposure to real ECGs, radiology reads, or complex patient cases. Cadavers and textbooks can't simulate clinical judgment.

Passive Learning Dominates

Lectures, rote memorization, and static MCQs dominate medical curricula. Students are not forced to reason — they memorize.

High Stakes, Low Feedback

Students only discover clinical gaps during high-pressure exams or worse, during residency with real patients.

The Solution

MedLab: The Clinical AI Reasoning Platform

**ECG &
Radiology
Cases**

AI-generated ECG and imaging cases with real-time feedback on diagnosis, differential, and treatment rationale.

**Patient
AI
Simulations**

Conversational AI patients presenting chief complaints, histories, and dynamic responses to clinical interventions.

**Gamified
Learning
Engine**

Streaks, XP points, leaderboards, and case difficulty tiers to drive daily active engagement across cohorts.

**Made for
all**

MedLab has a designated portal for everyone: From a student signing up independently, to an institution, that needs distinctive access for students, admins, and educators.

Early Validation & Momentum

MedLab

TSMU

First Institution partner
(No-cost, Live)

4

User Types onboarded

\$0

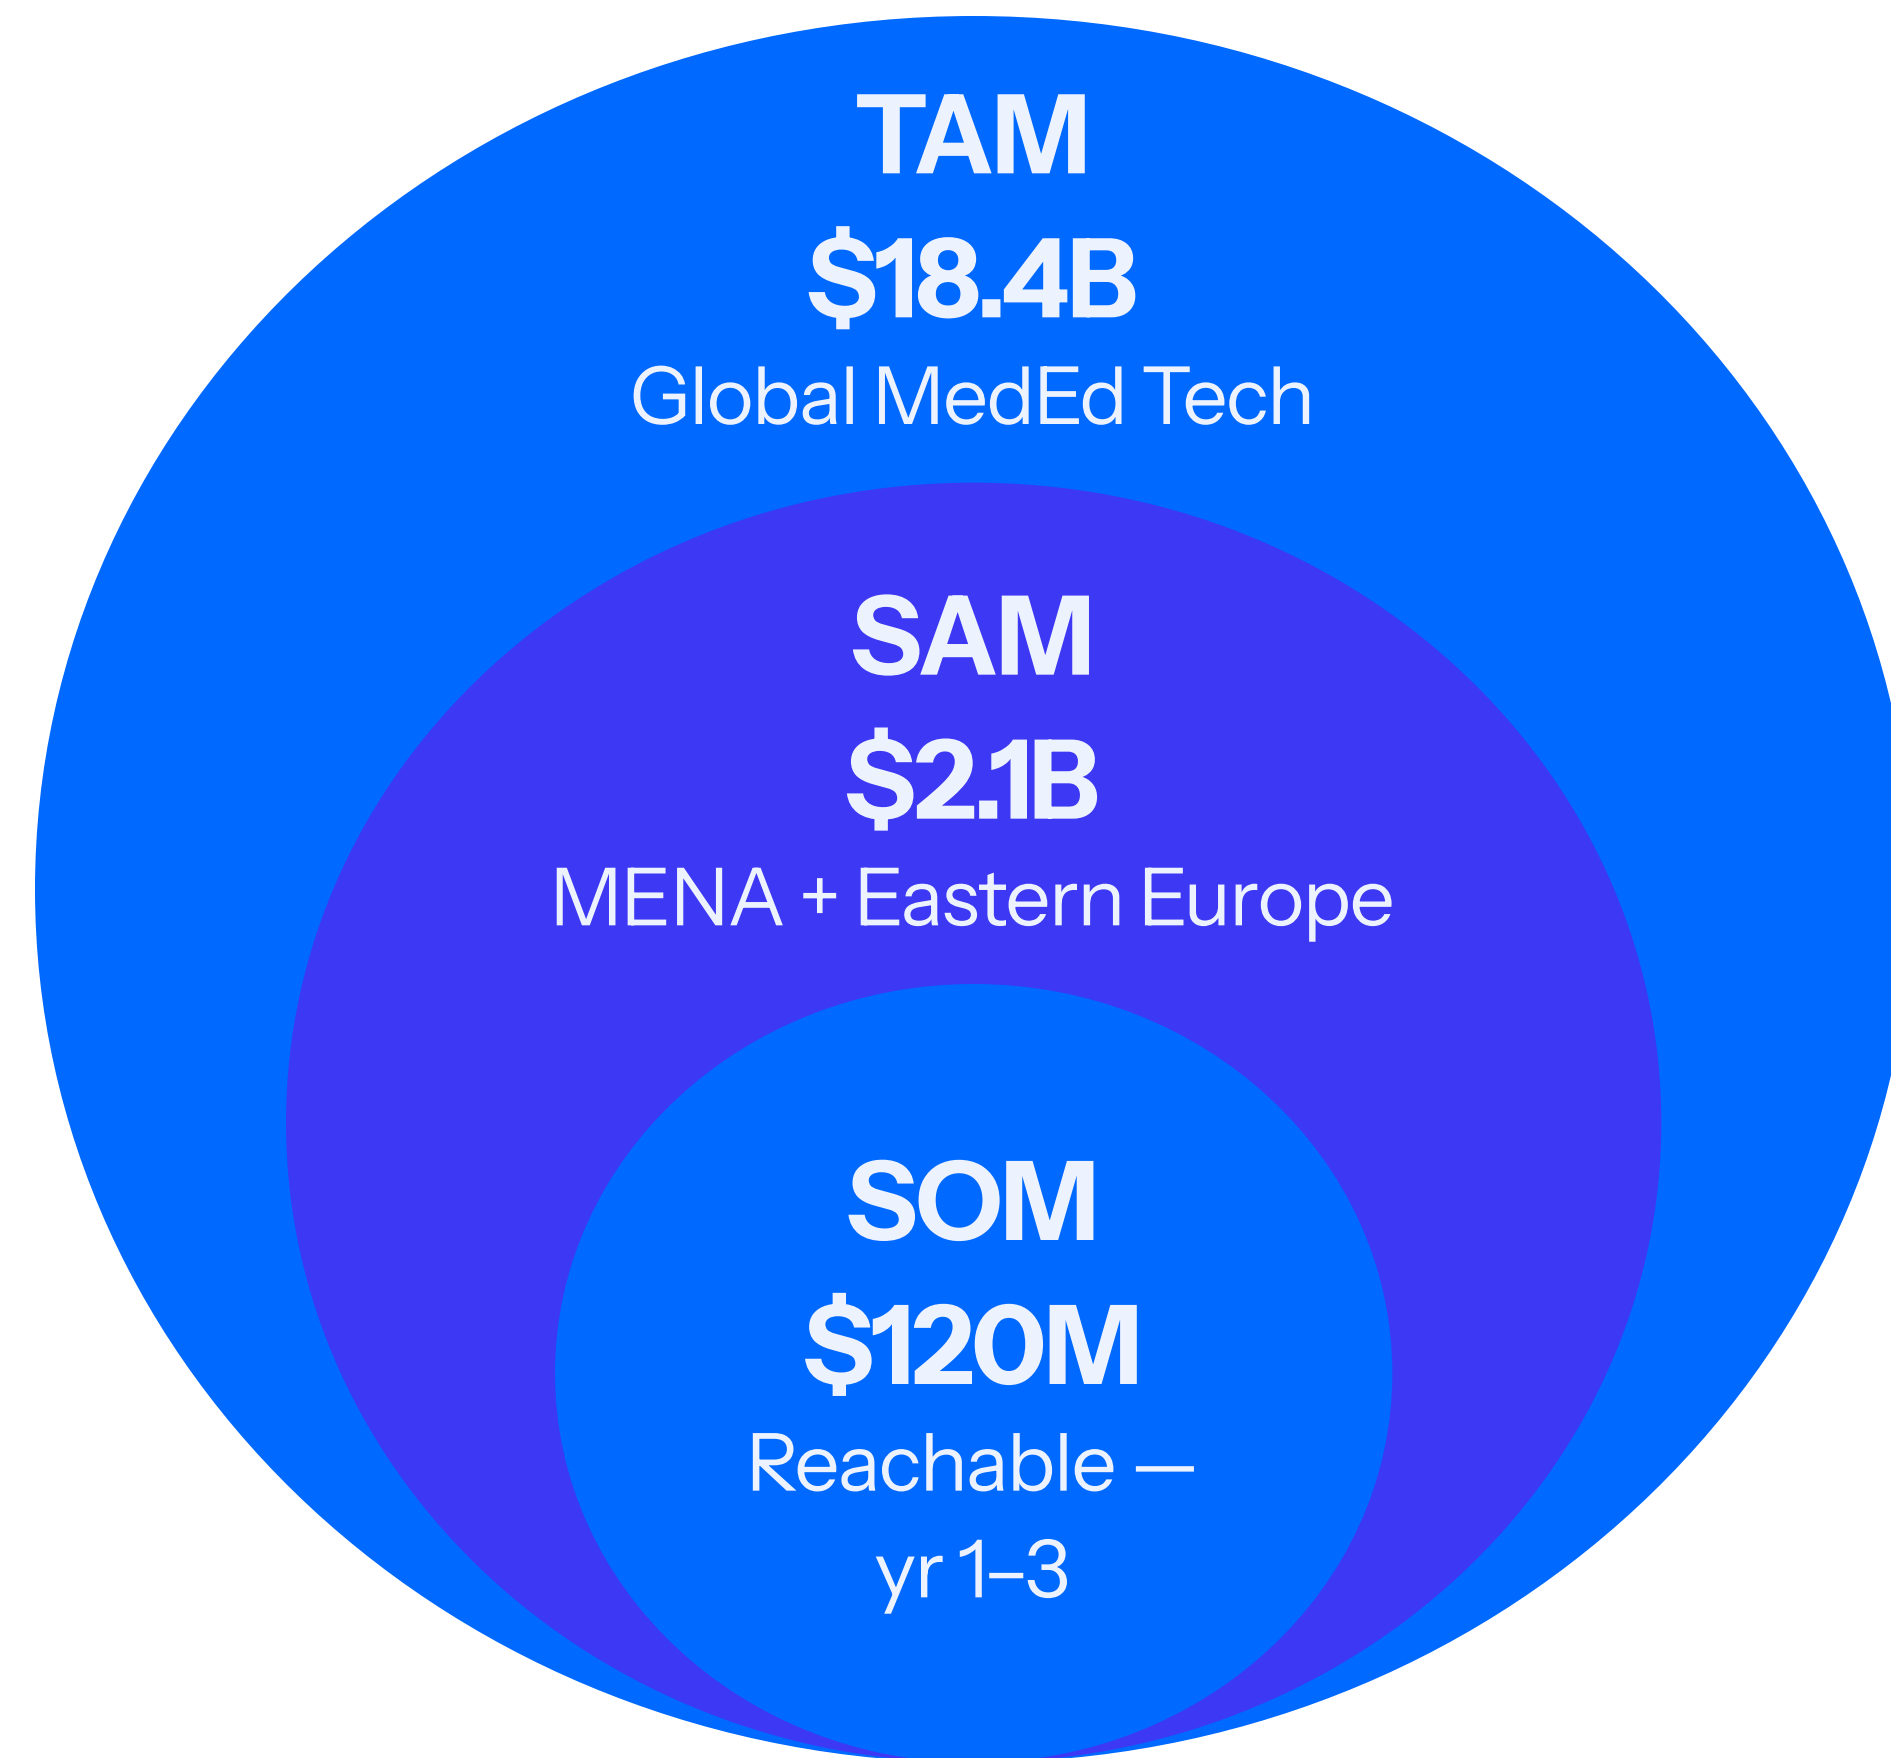

CAC via
Partnership

Milestones

- 2025 Q3 Prototype built — ECG module & patient AI simulation complete
- 2025 Q4 TSMU partnership made — 0-cost first institutional cohort
- 2026 Q1 Full onboarding flows, 3-tier institutional pricing, subdomain routing live
- 2026 Q2 Full platform live. Open to students — ready to train

A Massive, Underserved opportunity

MedLab

- **3.5M+ medical students globally; 400K+ in MENA/Eastern Europe**
- **2,200+ medical schools are potential institutional buyers**
- **MedEd Tech growing at 17.8% CAGR through 2030**
- **Hospitals spending \$8B/yr on clinical simulation training**

Business Model

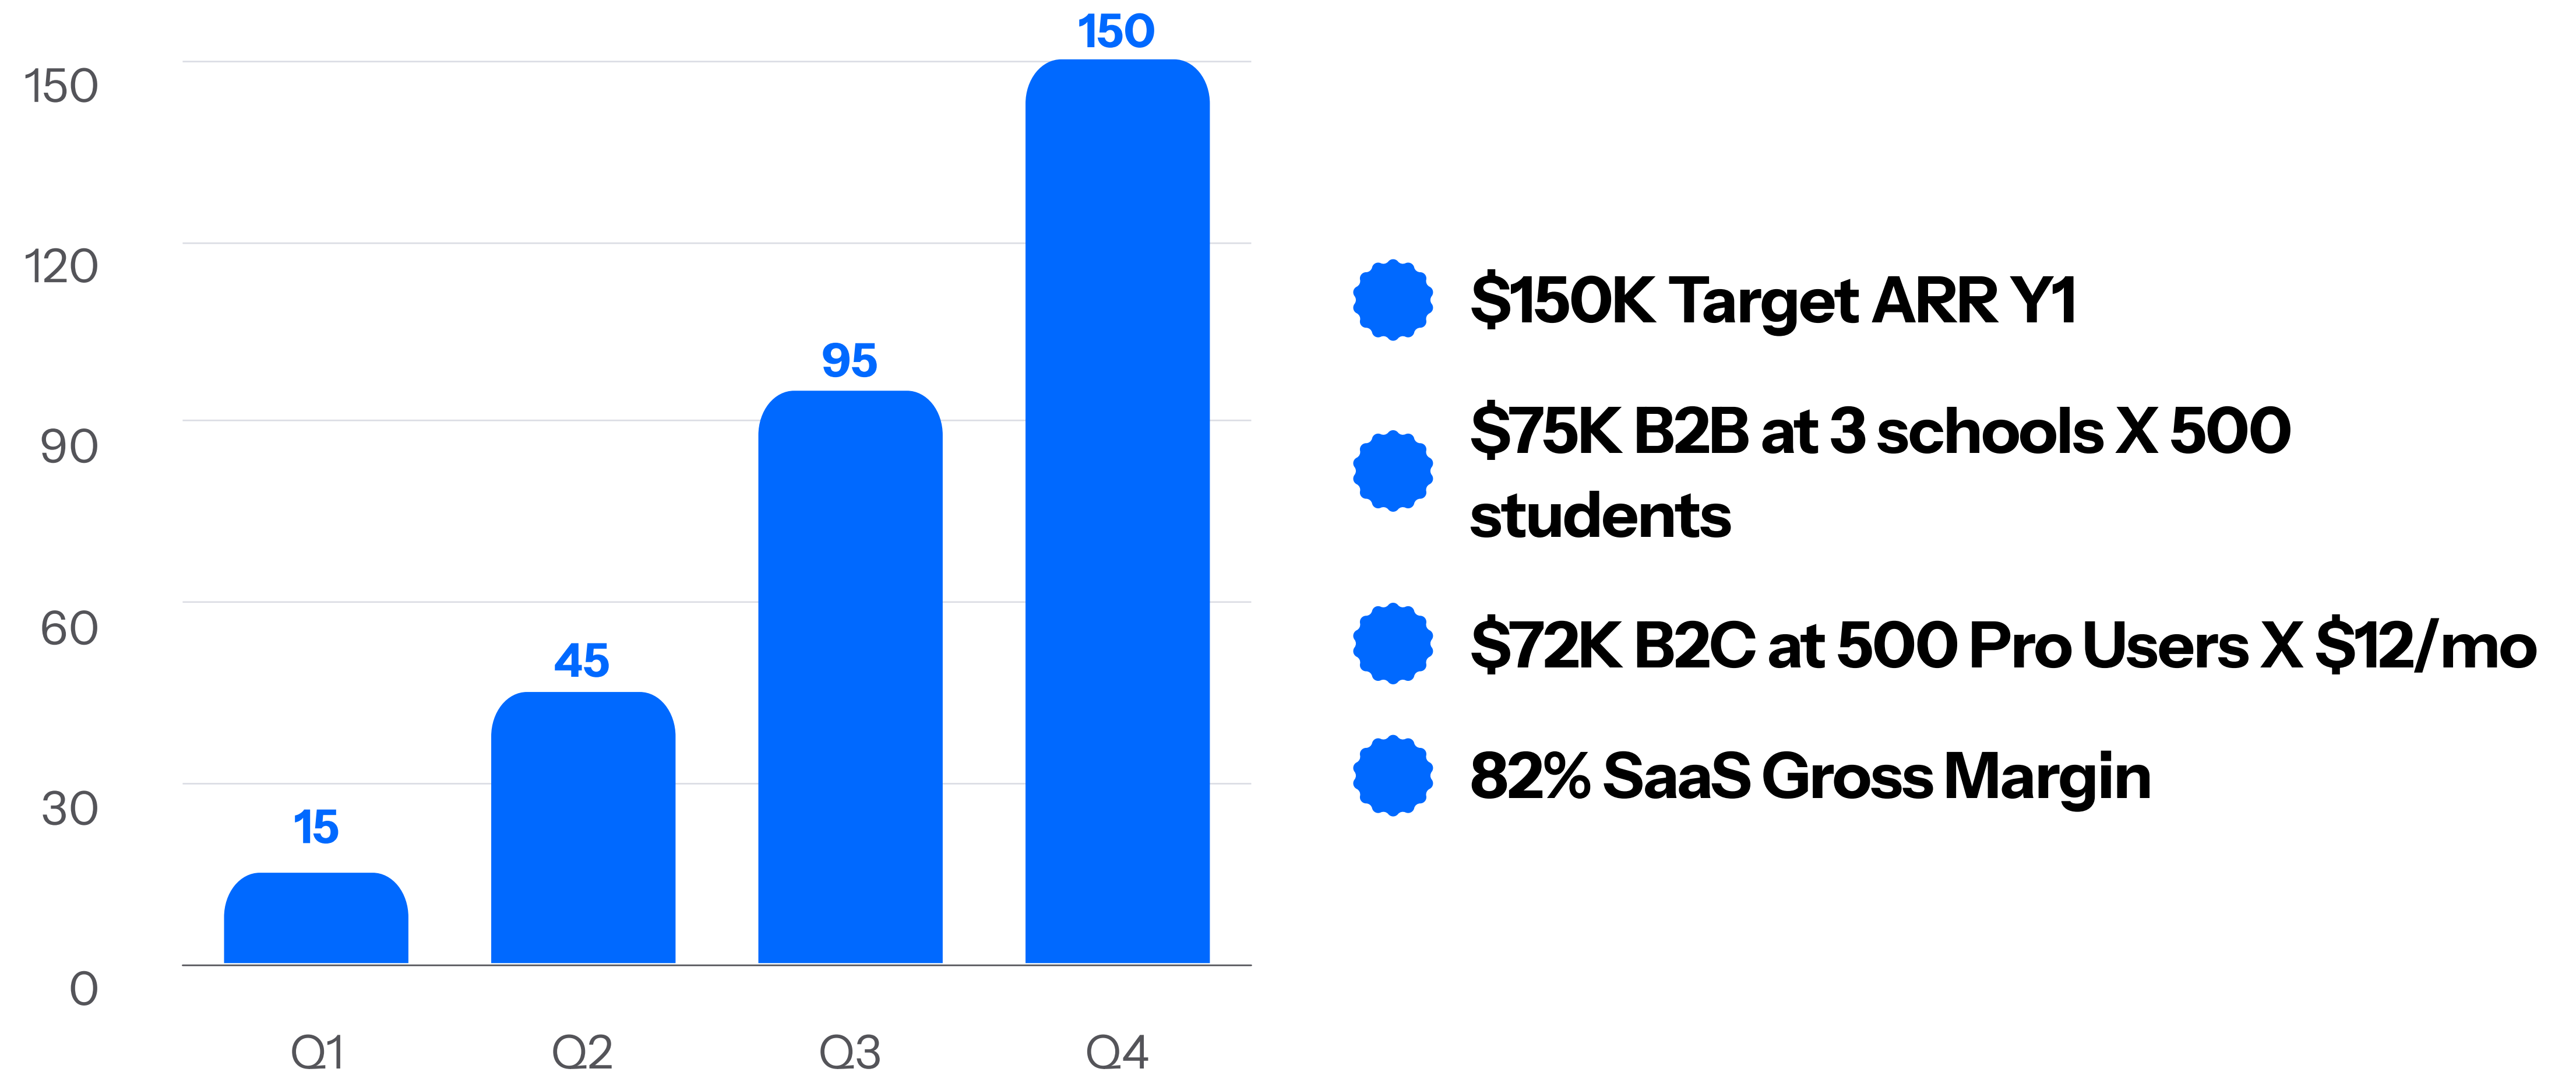

Institutional SaaS (B2B) + B2C Subscription

B2B - Institutional		
Tier	Price	Scope
Starter	\$30/student/yr	Up to 200 students
Growth	\$50/student/yr	Up to 500 students
Enterprise	\$80/student/yr	2,000+ + Custom AI

B2C - Students		
Tier	Price	Scope
Free	\$0/mo	5 cases/day, core modules
Pro	\$12/mo	Unlimited cases, all modules

Path to \$150K ARR in 12 Months

MedLab

TSMU as Proof → Regional Expansion

Phase 1

Anchor

2025-2026

- TSMU as live reference client
- B2C free tier viral growth
- Direct outreach to 3 regional universities
- Case library: 500 ECG + 200 radiology, custom made, outside of AI

Phase 2

Scale

2026-2027

- 12 institutional partners (MENA/Caucasus)
- Hospital simulation licensing pilot
- Localized Arabic, Georgian, Russian content

Phase 3

Expand

2027-2028

- VR features added
- API partnerships with LMS providers
- White-label for hospital residency programs
- Series A readiness: \$1M+ ARR

MedLab Owns the Regional AI Niche

MedLab

Feature	MedLab	Osmosis	Amboss	Aquifer
AI Patient Simulation	Yes	No	No	Partial
ECG + Radiology Cases	Yes	Yes	Yes	Yes
Gamification Engine	Yes	Partial	No	No
MENA/Eurasia Localization	Yes	No	No	No
Institutional Dashboard	Yes	Yes	Yes	Yes
Price (Student/yr)	\$12/mo	\$~200	\$~180	\$~150

MedLab

**The future of clinical training
is AI-native, interactive, and
global.**
